

Week 4 / Day 1 – Swagger API

Assignment_1:

- * Add a radio button for **Accept Link** and another radio button for **File Upload**.
- * If **Accept Link** is selected, display and populate the input box for entering the link.
- * If **File Upload** is selected, display the file upload option.

Click on Import link

Assignment_2:

Enhance the existing application by implementing a feature that automatically categorizes the generated test cases into standard testing types such as Smoke, Sanity, Regression, Functional.

Once the test cases are generated, the application should classify each test case into the most appropriate category and display the categorized results in a structured and user-friendly format

The new functionality should seamlessly integrate with the existing test case generation workflow without impacting current features
