Phase 2/Week4/Day 2 :
Home Assignment :
Homework Assignment: Jira Integration

You already have the existing application with *ingestion, retrieval, MongoDB, frontend, and test case generation* functionality.

For this assignment, extend the existing application by integrating *Jira*.

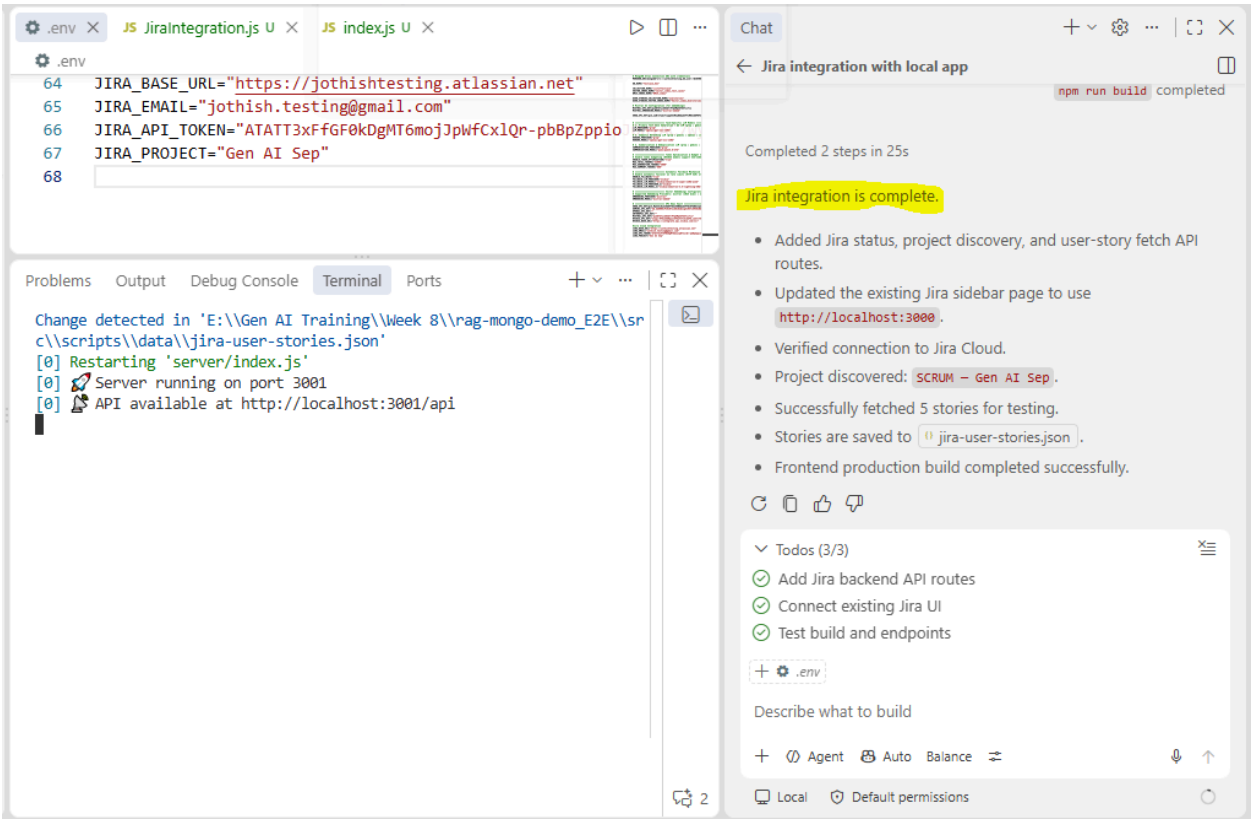

Requirements
* [ ] Integrate *Jira* with the existing application.
* [ ] Fetch the *user story from Jira*.
* [ ] Ingest the fetched user story into *MongoDB*.
* [ ] Retrieve the existing/relevant context from MongoDB.
* [ ] Use the Jira user story along with the retrieved context to *generate test cases* using the existing functionality.
* [ ] Display the generated test cases in the frontend.

Expected Flow
Jira → Fetch User Story → Ingest into MongoDB → Retrieve Existing Context → Generate Test Cases → Display Results

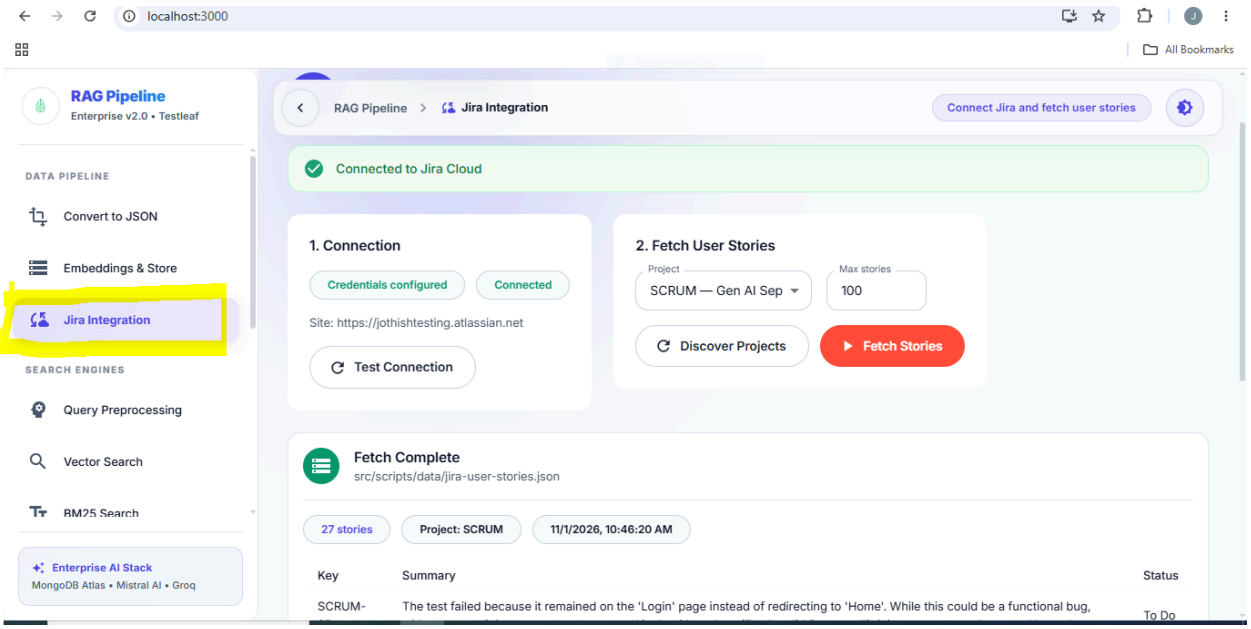

Note: You do not need to rebuild the existing ingestion, retrieval, or test case generation functionality. Focus on the *Jira integration and connecting it with the existing flow*.

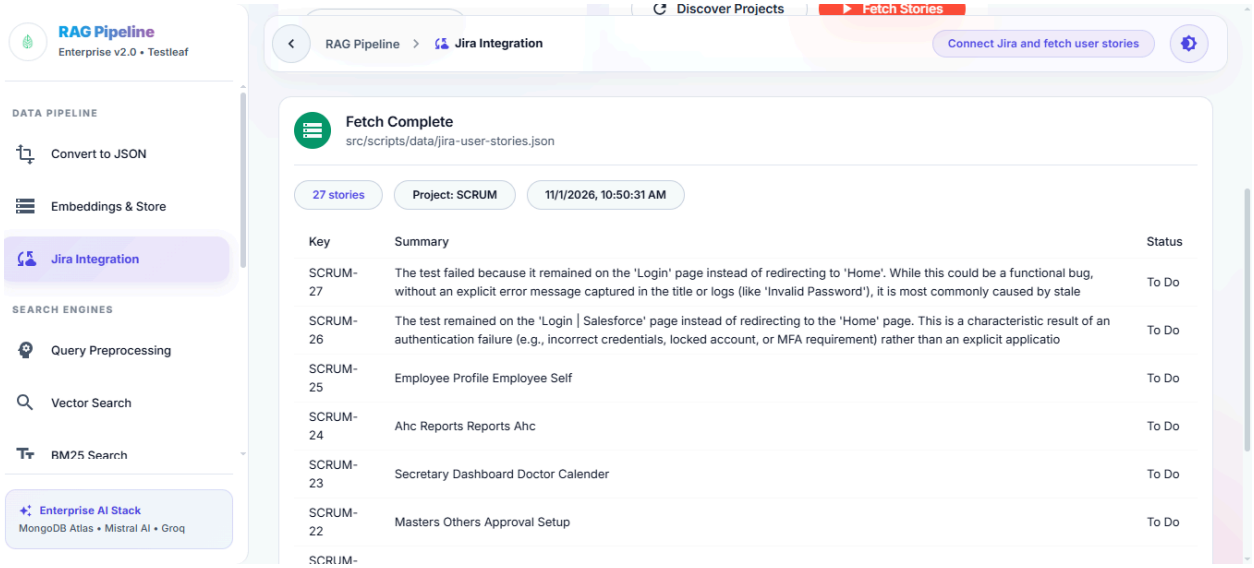

Integrate Jira with RAG UI:

Step 1 : Integrate *Jira* with the existing application.

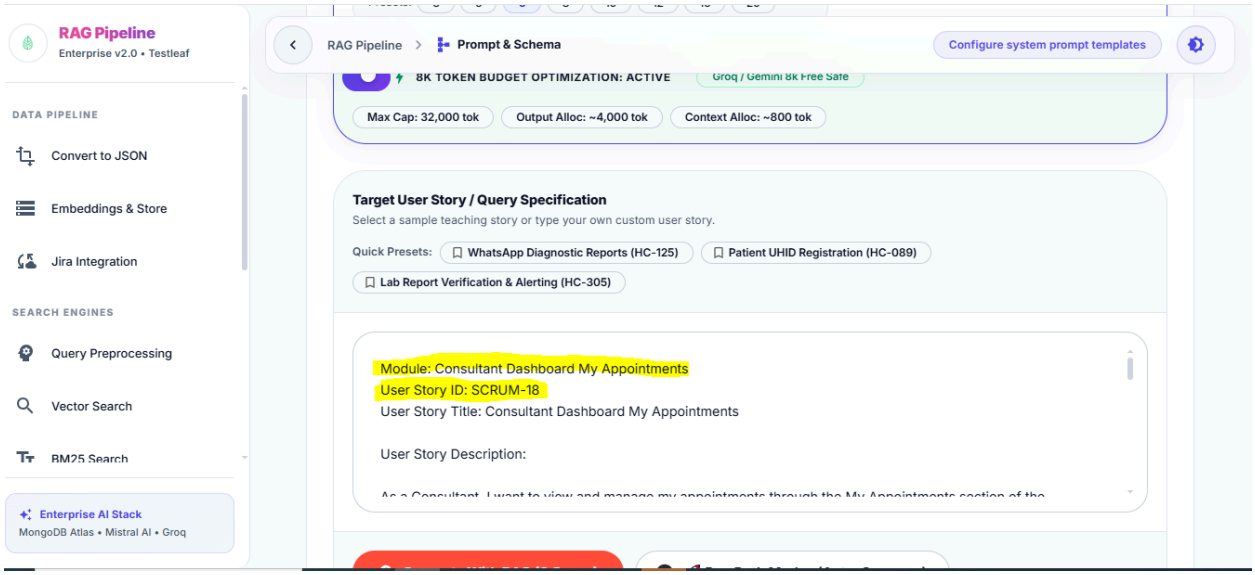

Step 2: Fetch the *user story from Jira*.

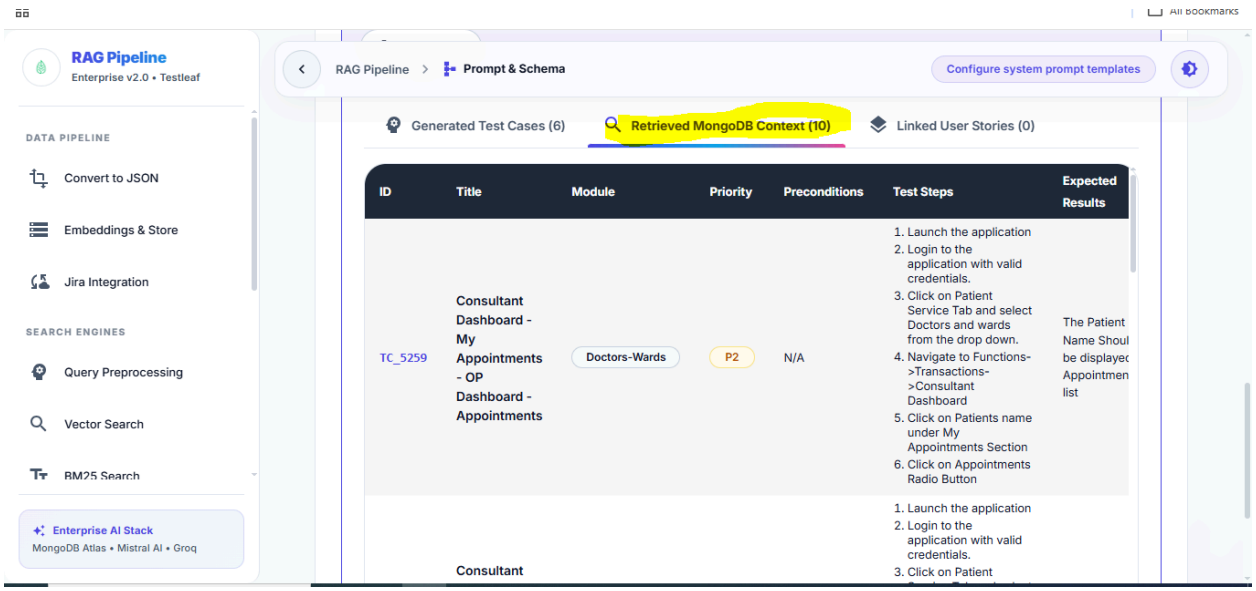

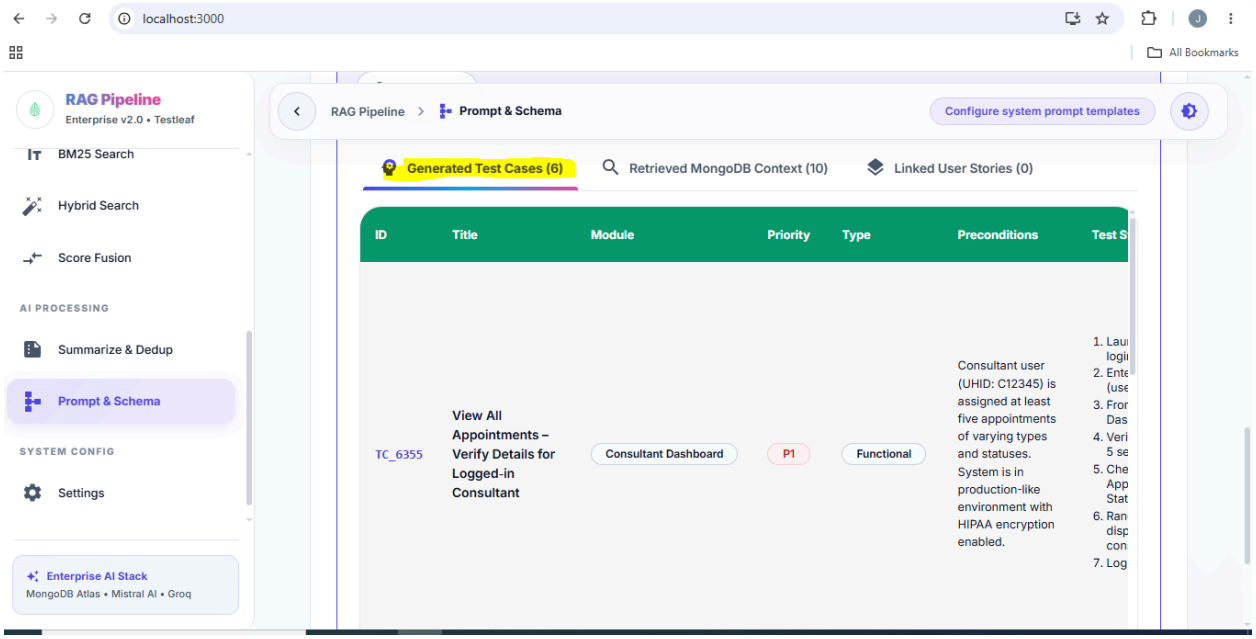

Step 3 : Ingest the fetched user story into *MongoDB*.

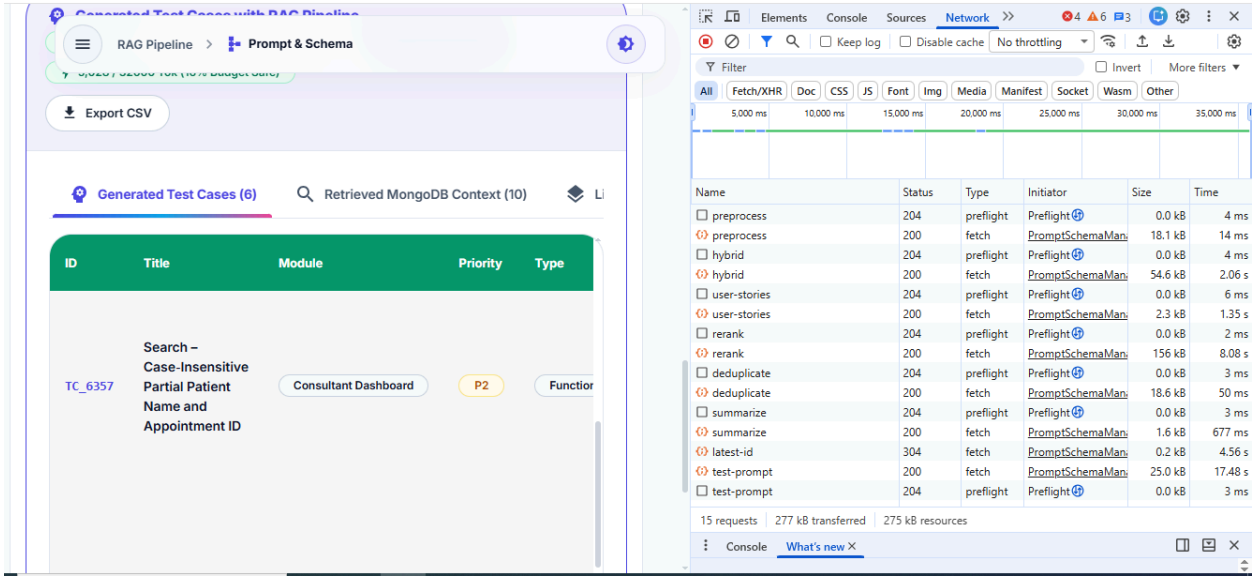

Step 4 : Retrieve the existing/relevant context from MongoDB.

Step 5 : Use the Jira user story along with the retrieved context to *generate test cases* using the existing functionality.

Step 6 : Display the generated test cases in the frontend.
